# UNITED CARE

## Leading manufacturers and suppliers of equipment for patient transfer and care

We are experts in innovative solutions to transfer, position, change, shower and bathe people with specific needs. We enable carers to concentrate on the all-important personal care by providing space saving equipment that saves time, reduces risk of injury, increases efficiency and comfort.

United Care equipment is commissioned worldwide by occupational therapists, architects, contractors and end-users. Our equipment is installed in hospitals, long-term care homes, schools, leisure centres, public buildings and in domestic environments.

Wherever our equipment is installed, we bring specialist advice, a speedy service and care and attention before, during and after installation to ensure the best possible solution for all patient handling needs.

At United Care we work with a range of different clients with a variety of needs. No matter what the challenge or situation, our whole team is passionate about patient handling and finding the right solutions for carers and our users.

**Nick Kent, UK & Export Director**

### United Care in the Community

Providing publicly available Changing Places in locations such as museums, universities, airports and shopping centres offers a vital life-line to carers and those with disabilities.

United Care manufactures equipment and offers technical expertise for builders and architects to ensure these vital facilities are available for everyone, offering the disabled community confidence to travel and visit new areas of interest.

Our many years' experience has positioned us as a market leader in many countries. We are more than just experts in safe, comfortable and efficient transfer systems. Our expertise means we can offer bespoke design solutions and manufacture fit-for-purpose equipment at our factories in the UK and Netherlands, ensuring we are at the leading edge of new ideas and technologies.

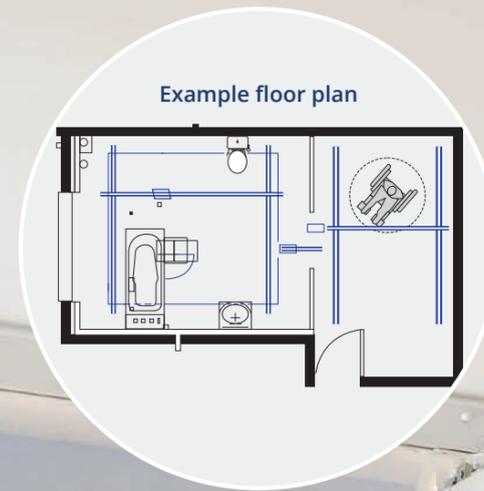

Our product specialists have in-depth knowledge to specify equipment which saves valuable time and cost for our clients worldwide.

Our professional advice from the room-layout through to the installation, aftercare and training is what sets us apart from other suppliers. As no two buildings are the same, United Care focuses on the design of bespoke solutions which meet individual needs, rather than off-the-shelf equipment which can never provide the personal touch.

When you work with United Care, you can be sure of attention to detail, fast, efficient and personalised customer service, and products which are high quality, innovative and individually tested to the latest international standards.

### United Care Worldwide

United Care work throughout Europe, Asia, the Middle East and Australasia, providing solutions for hospitals, long-term care, rehab centres and home care.

- CAD drawings
- CPD seminars

#### Contractors:

- Site survey and assessments
- Technical details and drawings
- Cost saving direct from the manufacturer
- Pre-Installation advice and guidance

# WHERE WE INSTALL

## Hospitals

United Care equipment is used for physiotherapy or occupational therapy, bariatric, general wards and accessible bathrooms.

## Nursing Homes and Hospices

In bedrooms, bathrooms and the living areas our equipment saves time, reduces the risk of injury and creates space.

## Rehabilitation Centres

For hydrotherapy, physiotherapy, gait training or occupational therapy OpeMed's ceiling hoists and showering equipment allows for efficient and focused treatment.

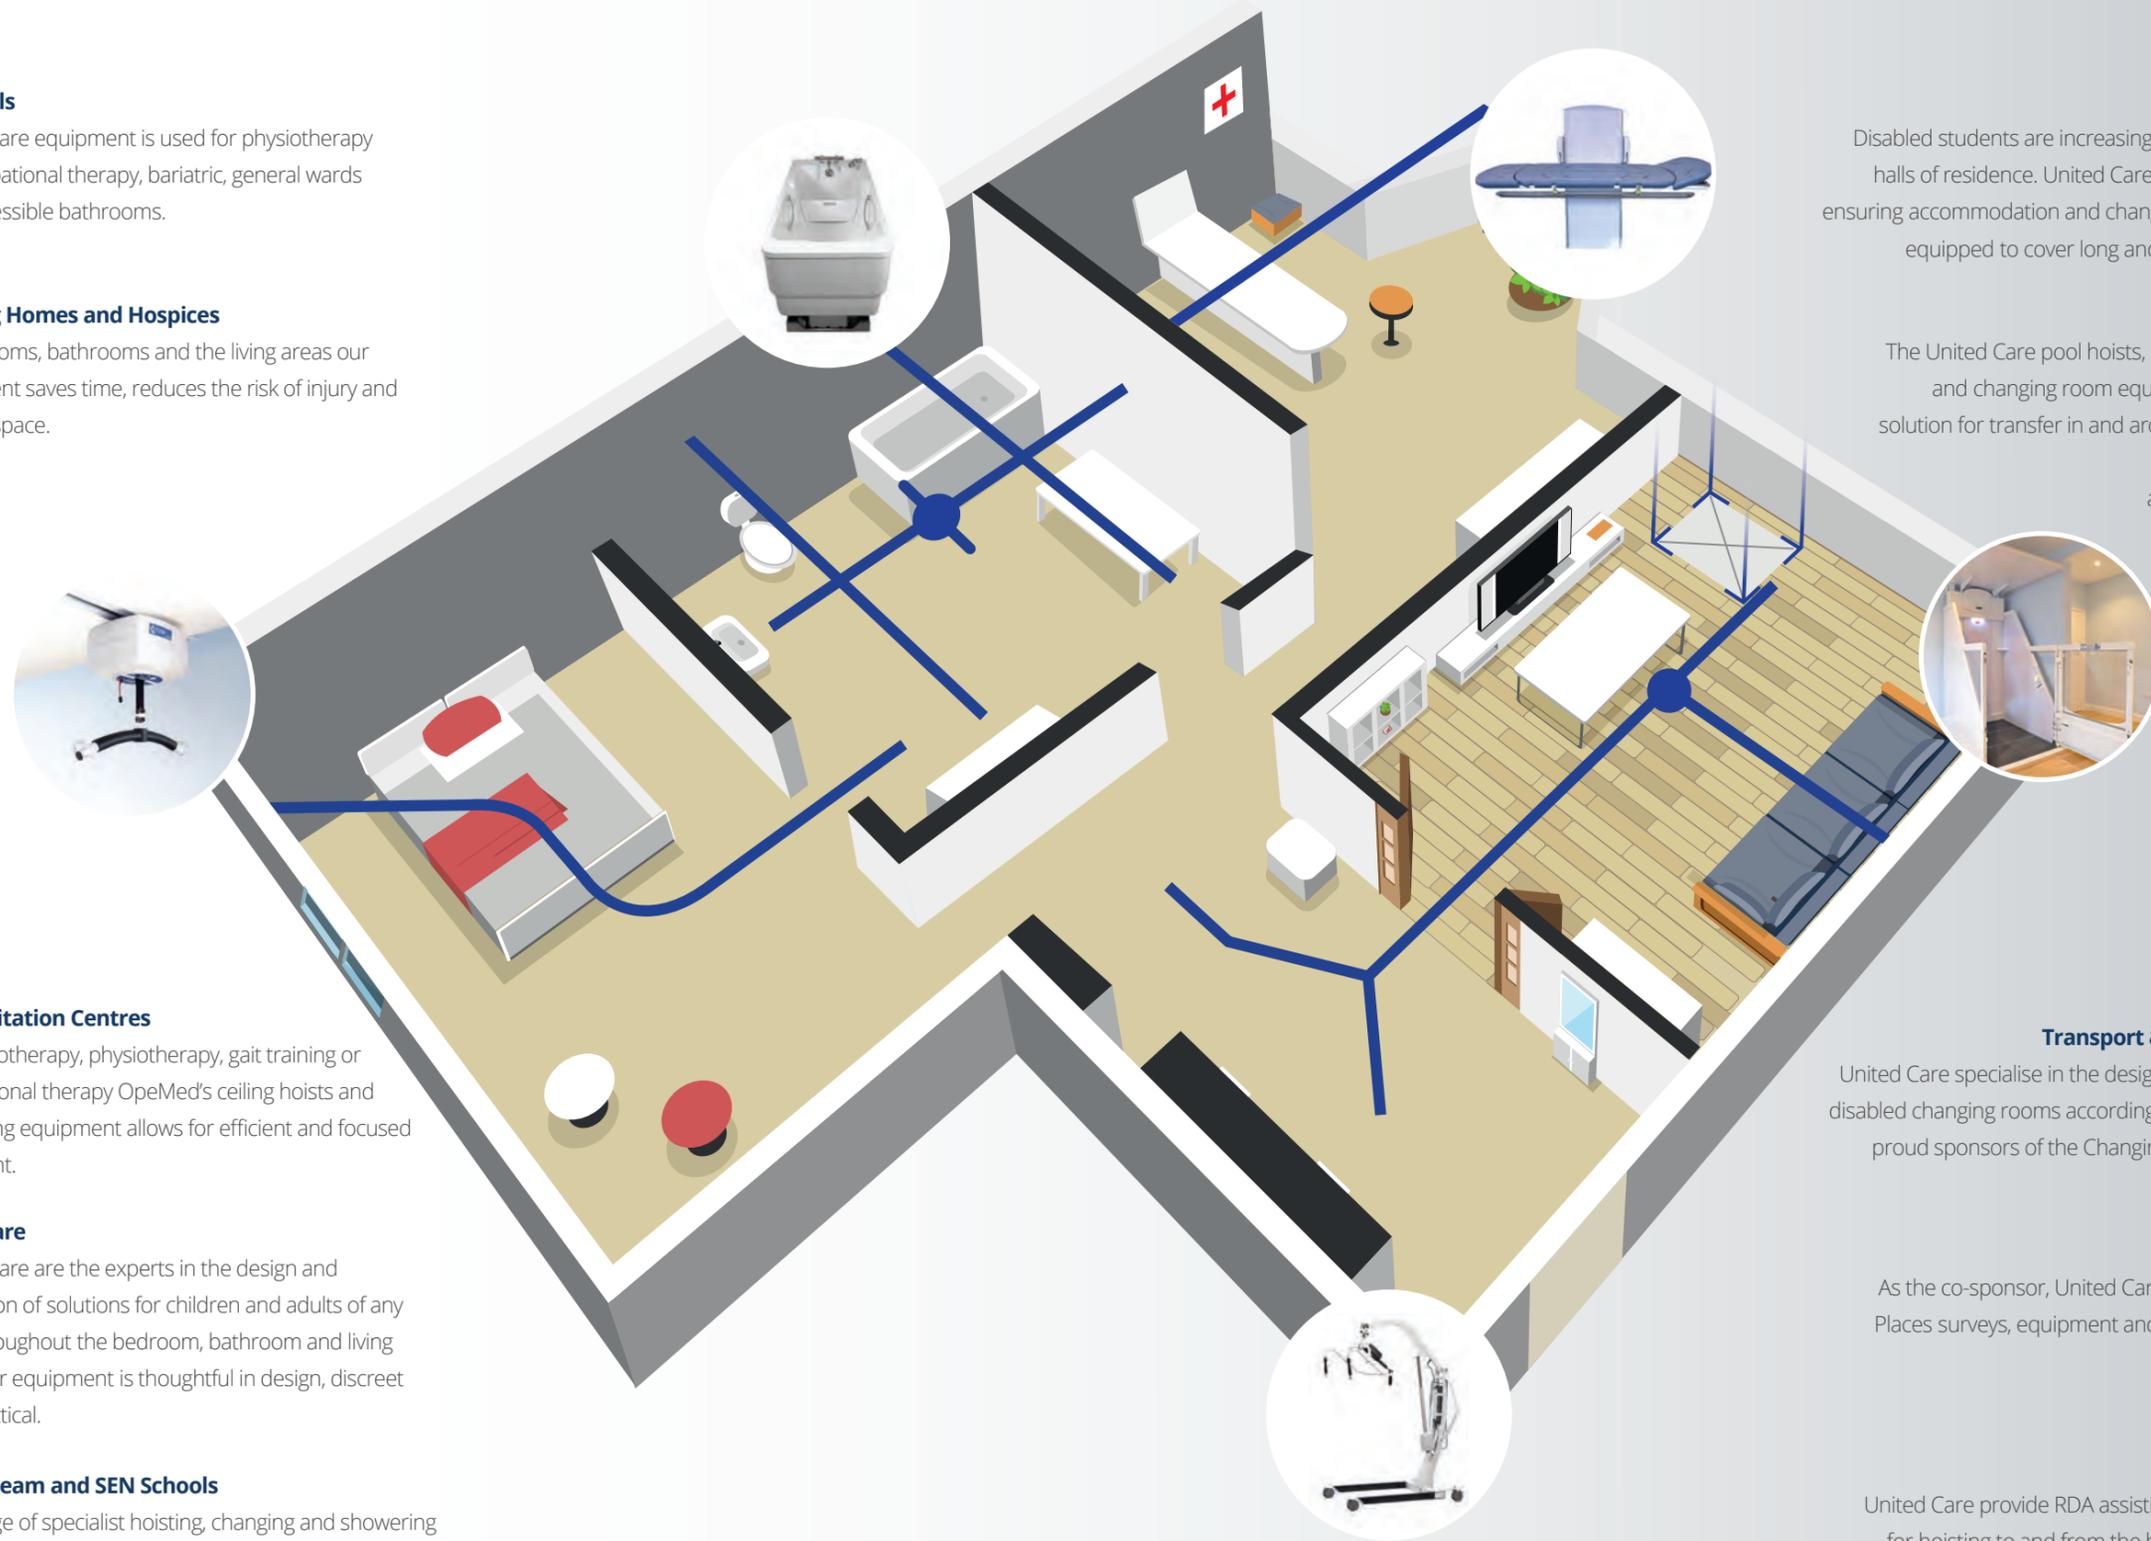

## Homecare

United Care are the experts in the design and installation of solutions for children and adults of any age. Throughout the bedroom, bathroom and living areas our equipment is thoughtful in design, discreet and practical.

## Mainstream and SEN Schools

Our range of specialist hoisting, changing and showering equipment is ideal for support in classrooms, hygiene rooms and assisted bathrooms.

## Universities

Disabled students are increasingly living in university halls of residence. United Care are experienced at ensuring accommodation and changing rooms are fully equipped to cover long and short-term needs.

## Leisure Centres

The United Care pool hoists, hydrotherapy slings and changing room equipment are an ideal solution for transfer in and around the swimming pool and changing areas.

## Transport & Public Buildings

United Care specialise in the design and installation of disabled changing rooms according to BS8300 and are proud sponsors of the Changing Places campaign.

## Changing Places

As the co-sponsor, United Care provide Changing Places surveys, equipment and installation for any facility.

## Riding Schools

United Care provide RDA assistive hoist equipment for hoisting to and from the horses, suitable also for stables with high ceilings.

# BATHROOMS

Independence and safe mobility are important considerations when planning the layout and equipment needs for a bathroom. Whatever the size, shape or requirements, United Care has a range of equipment to choose from:

## Ceiling Hoists

The OT200 Compact Ceiling Hoist with its unique gravity charging system is the ideal solution for transfer. With a range of spreader bars, the OT200 is quiet, easy to use and enables users to traverse with dignity while reducing the risk of injuries to the carer.

## Assisted Bathing

Our range of height adjustable baths, with or without inbuilt changing tables, are sought after for the satisfying and therapeutic bathing experience they provide. They are available fixed or free standing, and with height adjustable features.

## Changing Tables

Our height adjustable changing tables allow the user to set the correct and safe working height for the surface. With the ability to move the changing table to the correct working height, front line back injuries are reduced and working ergonomics improved.

## Washbasins

Our multifunctional height adjustable washbasins suits users with special and progressively changing needs. The subtle hand control contribute to user independence and the updated styling looks great in any environment.

## Shower Trolleys

We offer a range of shower trolleys designed to slide over surfaces (such as mattresses) as well as to consider restrictions such as space, all with the aim of reducing the risk of injury to the carer and the safety of the user.

## Assisted Toilets

Our range of assisted toilets help provide independence in the bathroom. Combining the convenience of a warm water wash with warm air-dryers alongside other enhancing features, these toilets are easy to operate and touch-free.

# BEDROOM AND BEYOND

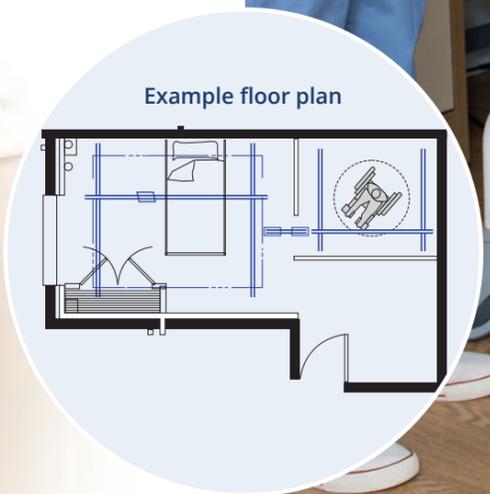

Comfort and design are important aspects of any bedroom while access to the rest of the house or building brings greater independence.

**Ceiling hoist** – The OT200 Compact Ceiling Hoist is the smallest professionally used ceiling hoist on the market. Offering a smooth and quiet transfer, the OT200 has a unique gravity charging system and no lights at night, making it an easy choice for the bedroom environment.

The ceiling hoist tracking is made up of many modular units and can be easily installed bespoke to the environment. We provide easy room-to-room transfer with an intelligent magnetic gate systems ideal for transfer from the bedroom to en-suite bathrooms.

**Through Floor Lift** – Our through floor lifts fit into any home and bring freedom of movement throughout the whole house. Home wheelchair lifts can be located in any downstairs room and move up through an aperture in the ceiling to the room above.

Our lift range meets most home and lifestyle needs. We can cater for larger or smaller loads as well as open hatch or enclosed loading areas. We also aim to cater for the height required by the user (up to around 6 metres).

# TRANSFER SOLUTIONS

## Hospitals and Therapy Centres

United Care offers a range of hoists and slings to help facilitate physiotherapy, rehabilitation or for general transfer from the bed to bathroom.

Used in a variety of locations, our solutions are designed to bring comfort and ease of use to users and carers alike.

For patient transfer our OT200 Ceiling Hoist brings a full room solution with a covering XY system which saves time, reduces the risk of injury, provides improved positioning, frees up space and reduces the number of transfers.

For gait training the United Care OT200 Ceiling Hoist in combination with our Walking Harness is the ideal tool for a Physiotherapy Ward. The hoist can be “walked” by the patient as part of rehabilitation and when extra support is required the hoist can be driven along the track to aid training.

Our walking harness comes with adjustable straps to ensure optimum support and prevents a “drop” if the patient falls by ensuring there is always tension.

For spa and pool areas, we have a range of hoisting solutions to provide seamless transition from changing facilities to water, allowing users a therapeutic and dignified experience from start to finish.

## Changing Places and Public Amenities

Our range of essential equipment is ideal for Changing Places and Public Amenities. United Care provide a complete solution of Ceiling Hoists, Changing tables, Support Arms, Grab Rails, Privacy Screens, Toilets and other ancillary items. This equipment is designed to accommodate a variety of users with a range of needs, providing dignity to users and support to carers.

Our solutions are available with design advice and expert consultations devised to make installing a Changing Facility or Public Amenity an easy process. *United Care are the official co-sponsor of the Changing Places Campaign.*
